WORK EXPERIENCE

GLOVO

Jun 2016 - current
Barcelona

WEB LEAD DEVELOPER

In charge of having an up-to-date ecosystem that has some consistency and follows good code practices in the web team.

Cool things done:

- Migration of the Glovo webapp from Angular to Vue.js (<http://tech.glovoapp.com/a-wonderful-journey-migrating-from-angular-to-vue-js/>).
- Updated the admin panel from Django to Vue.js + Java.
- Creating a partners webapp that connects to ECS/POS bluetooth printers.
- Wrote a full Kotlin app (yes, we did some Android too)

GLOVO

Sept 2015 - Jun 2016
Barcelona

ANDROID DEV & FRONTEND DEVELOPER

Doing what I love, a little bit of Android and a little bit of Full-stack.

To develop the Glovo Android app we used RXJava, Events buses, Retrofit, Butterknife & all the awesome things that we use these days!

OLIVA CARD

Feb 2015 - Sept 2015
Barcelona

ANDROID DEV & SOFTWARE ENGINEER

A small startup where as a one-man-team I developed the Android app and website of Oliva Card, a loyalty solution for small merchants. Learnt a lot implementing QRs, NFC and different technologies in Android.

EVERIS

2013 - 2015
Barcelona

SOLUTIONS ANALYST

First job out of the university: software consultancy. Learnt Java, Databases, Spring, Hibernate and even Adobe Flex!

EDUCATION

2006 - 2013

UNIVERSIDAD POLITÉCNICA de BARCELONA

Telecommunications Engineering - Telematics speciality

1992- 2006

LYCÉE FRANÇAIS de BARCELONE

Elementary & High School - Barcelona

PROFILE

Born in 1988, Boston (USA) and living in Barcelona since I was a child. Telecommunications Engineer.

My adventure started with Android, but nowadays I work as a Frontend Tech Lead. Open source and exciting projects are a must in my life.

SKILLS

- Javascript: Working with ES6 & ES7 on a daily basis. Touching all the frameworks (Angular, React) and in love with Vue (making-a-library level). Node.js for the backend. Battled with Webpack.
- Android: Android, Java & Kotlin.
- FrontEnd: CSS in a smart way, Flexbox, GridLayout and preprocessors.

OFF-WORK

I don't stop doing things.

At a tech level, right now you'll see me coding and learning:

- Blockchain & Smart Contracts
- Bots/AI/Machine Learning
- Open source projects

But a better thing than learning is to be able to teach and communicate your knowledge. That is why you'll see me:

- In a bunch of Meetups
- Going to conferences
- Writing as much as I can in blogs/websites

Also, my love to Android comes from my first big project. In 2009, I co-funded one of the biggest Android related websites in Spain: El Androide Libre. We grew it from nothing to more than 200k visitors/day. Ask me about it and I'll talk for hours!
